Perhaps Theodere Roesevelt is the most popular ing often too low, with space at the rear which carries away much of the man in the world, but he is far from giving universal satisfaction. He is being melody and the results, while appreciated by the audience, possibly, are far he would put on the brakes or the soft pedal. But that doesn't prove that the performance, that he or she has "made good" teverse would be satisfactory. There are people who will find famt with the manner in which the surroundings appealed to them. General Kitchener is a great man, pause, or an auto stops with a ragging of cogs and gives a few snorts when a military genius who did more than any other to end the Boer war, and who won distinction in the Sudan, and India, and Afghanistan. Many concede he is the greatest living general, whether he is or not. But he comes quietly, as a private citizen who doesn't want to be interviewed, or have his digestion ruined. And already we note bints that he is a snote. And possibly there is some truth in that. The English are a capable race; they are capable of almost anything but forgetting they are English. But the hero of the Transvant. and the Sudan has proven again, as effectually as the hero of Sun Juan and Oyster Bay, that we are pretty hard to please

READ THE SIGNS.

Henolulu has enough educational institutions to provide all its inhabit sufficient learning to make a native of Boston, in the use of the English guage, look like a first grade schoolboy. But when it comes down to the gauge, look had a most game in the making of signs, a careful investigation show that the money expended has to a great extent been wasted,

Signs is an old subject, but always new. In Honolulu it has been exploited, but never exhausted. I took a trip down Palama way on Thank an search of a store where it was told me homemade macaroni of first-class of dy could be found. On my return I walked part of the way, and had my ab tion attracted to a few curious statements employed for the purpose of atth ing the attention of the public to the business being carried on by the pants of the building in the front of which the announcements appeared

One man, probably an oriental, evidently intended giving notice that nuts can be purchased by the paper bag or sugar sack. But either his hi or his knowledge of plurals was shy, for he cut out an "s," with the rethat the information afforded you by the sign is: "Roast Peanut, whole and retail," may be procured.

The man immediately next to him was liberal in provision for themple ing, paint and conception of the use of the apostrophe, for he proclaimed follows: "Tai Loy Lodging House 15c-25c-one night's." The translation thereof can not be given by me, for it was written on the signboard in China

If your head is of a peculiar shape, and you need to have a tailer and chapeau, an anti-Russian gentlemen by the name of G. Shiagawa proclaim; arge black letters "Straw Hat Make," and the artist accompanies his son what vague claim of the accomplishments of his employer by a painting of hat intended to look like straw and fashionable, and as lifelike as anythin Jamie Wilder ever put on canvas.

And, just before I reached the Numanu Stream, I struck a notice, hung before a modest looking store, which even yet is as inexplicable to me as recruiting of Russian "laborers." It was spelled correctly, and evidently to structed by a professional painter. But while he who ran might likewise to doubt very much whether he could understand. It said: "W. Shingen Tinsmiths, Umbrella Repairing, Etc." "Tinsmiths" was all right, although I could not quite understand how one individual could boast of being more tin one, "Umbrella Repairing" was also all right. But the "Etc." bothered & and when I got home I looked it up in my son's Funk & Wagnall's Starley Dictionary. Here is what these learned gentlemen say it means: "And it other things, or the rest; and so forth; used to indicate others of a kind, das or the like, to be easily inferred from those already specified."

And if a miracle happens, and a Jap tells the truth, and the dictions may be relied on, anything in the tin line may be manufactured to order, at epairs, even including those necessary for political fences, will be prompt

. Y. Yamawaki declares he is a "shoe's maker;" omitting any connection etween the last four letters of his name and his chosen profession.

The Chinese permit not the Japs to get the better of them in versitor of occupation or originality of expression. Mr. Ling Kee hired a sign man elp him out in selling merchandise, and the result of their joint efforts me be read by you any time. It is: "Smoke Tobacco and Cold Drink," The Chinese concern, evidently unable to afford assisting Tom Shar is

kasa, Watch, Maker Gold or Silver. Something." The sign quits there al then, without explanation as to how much it costs to watch, or to have gill or silver made, or what "Something" is. And there were other queer sings too numerous table I informed my provider of some of the discoveries I had made. Helm ed up for a moment from a composite consumption of soup and the Bulletin and remarked that sometimes white people made as bad breaks, and that m day, on Queen street, might be observed a sign, some thirty feet long, state; n letters at least two feet deep and several inches thick, "Monument for Che

ORIENTAL EDUCATION. Has it ever occurred to you that the Japs and the Chinese pay at least a much attention to the education of their children as do any other race! Is deed, insofar as the Japs are concerned, I believe the expression could be mix

I don't know what Doctor Clark's statistics will show as to percentage of nationalities attending our public schools, and percentages of illiteracy, at percentages of truancy and other percentages which congress in its wisdom but decreed shall be figured out and put nicely together and printed for our effor tion. Perhaps he will not give them correctly. The liberty loving Russia have instilled a new spirit in the people, and a growing tendency can be & served to resent the inquisitorial powers sought to be exercised by government officials. Even a white citizen, dignified by the term "prominent," appear to have become a Vasilieff convert, and figuratively slapped Uncle Sam in the face and pulled his whiskers by carrly informing him that his request for off along statistical lines was extremely impertinent. It may be that the glorid example set will spread to the orientals, and the enumerators, in their runs to Chinatown and Japanese camps, will be informed that Hawaii's temperature is too good for their constitutions, and that a warmer climate should fortish

But if the good Doctor gets anywhere near the facts, he will be able tell us that few of the brown and yellow boys are found on the streets, and for are hoodhams. They haven't time to be. The father and mother avail the selves of the public school system and almost invariably see to it that the youngsters attend. And when the hour of adjournment has arrived, and selos attending institutions where their own language is taught; and the balance the afternoon is thus consumed. I don't know whether the superintendent public education and his bosses, the board, keep track of these schools of It but there are plenty of them. Folklore and religion and the queer looks? writing and the no less weird spelling are all in the curriculum. In the Chias Ye have the Corpletion stood outside of the fire limits, or at least a part of schools mathematics including arithmetic, algebra, geometry and trigonometry be reliably secured.
